Subject: Revised IRAN Proposal

Ref: Letter DPD-1677-59

Dear Dan:

As requested in the referenced letter, we are herewith submitting a revised IRAN proposal. This proposal is based on the premises set forth in your letter with the exception of the following deviations:

1. The J-75 flight test program on 342 dictates that the airplane cannot be delivered the last of May as requested, and probably not until late August or early September.
2. Six week turn-around time is not adequate. We feel that the eight-week program as set up for the FOG ships is a minimum and scheduled accordingly. However, we have held to the premise of only two (2) airplanes in the IRAN cycle at any given time (excluding J-75 mod jobs).

Our estimate of funds required for this job is as follows:

	<u>Period Ending</u> <u>30 June 1959</u>	<u>Period Beginning</u> <u>1 July 1959</u>	<u>Total</u> <u>Required</u>
J-75 Modification (4 Ships)			
IRAN of Airplanes			

25X1A

Yours very truly,

25X1A
